POMA Core Values

POMA’s core values are comprised of Transparency, Accountability, Collaboration and Trust, Innovation and Creativity, and Servant Leadership as defined below.

Transparency is honesty and openness, particularly in the area of governance;

Accountability is the act of accepting responsibility and the obligation of an organization or individual to account for one’s actions. It is often linked to transparency.

Collaboration and Trust are dominant theme and highly valued within the association community and the health care delivery system. Both are viewed as critical component in producing successful outcomes.

Innovation and Creativity are central to POMA and their presence ensures receptivity to solutions and a willingness to take risks and actively pursue continuous improvement.

Servant Leadership is a leadership philosophy and set of leadership practices that focuses on serving others, places the success of the whole over individual success and emphasizes listening, empathy, and follows a belief that people can accomplish much when inspired by a purpose beyond themselves.

Selection Process

The selection process will be driven by the goal of selecting those individuals who can have immediate impact and make a sustained contribution to the work effort. Individuals are strongly encouraged to consider the criteria and decide on their fit and suitability for volunteer service. Organizational priorities will change from year to year and different talents and experience will be required as needs and challenges change. Assignments are made for a one-year period, with annual review and potential renewal. While each individual committee will have distinct criteria that relate to their work and activities the general set of criteria for selection are as follows:

- A clear understanding of, and demonstrable commitment to, the mission of POMA
- A willingness to prepare for, attend, and participate in meetings.
- Subject matter knowledge and prior experience in the committee's scope of work is a plus.
- A desire to learn and expand professional fitness.
- The energy and willingness to focus on and successfully meet Trustee determined outcomes.
